Angus Affordable Housing Need & Demand Calculation

Sensitivity Figure highlighted in yellow

Backlog of Households in Current Need				
Component	Options	Measure	Data Source	Angus
1.1 Homeless households & those in temporary accommodation	Those in Temporary Accommodation			
	1A. Snapshot of households in temporary accommodation	136	HL1 statistics: Snapshot at end of year 2007/08	136
	2A. Snapshot of households in temporary accommodation	101	HL1 statistics: Snapshot at end of year - Average 2004-2008	
	3A. 'Currently in temporary accommodation'	0	HNADA Survey: Q13 (4)	
	Those with Insecure Tenure			
1B. Households who have become homeless as a result of insecure tenure	39	HL1 statistics: Reasons for homelessness: Insecurity - Average of last 5 quarters to Q3 2008. Annual average flow = 218. Average quarterly flow = 55	39	
2B. Households with waiting list points: insecure tenure		RSL waiting list data		
3B. Households who have moved in past 5 years as a result of insecure tenure	26	HNADA Survey: Q33E (17-19) options included 'evicted by landlord' and 'asked to leave', 'repossessed by mortgage company'		
4B. Household under notice of eviction/ repossession, real threat of notice or your lease is coming to an end	0	HNADA Survey: Q80b		
1.2 Concealed households	1. Currently sharing amenities with another household but not sharing meals	219	HNADA Survey: Q17 (2-5) sharing kitchen/bathroom/WC but not meals with another household	219
	2. Sharing amenities is a serious problem for the household	0	HNADA Survey: Q80 (7)	
	3. Households with waiting list points: sharing amenities		RSL waiting list data	
1.3 Overcrowding	4. Friends/family no longer willing/able to accommodate	97	HL1 statistics: Reasons for homelessness - Q3 2008. Annual average flow = 338	779
	1. Households with 1 or bedrooms fewer than needed	2629	HNADA Survey: Q19 (4-5)	
	2. Households with 1 or bedrooms fewer than needed EXCLUDING single people	2313	HNADA Survey: Q19 (4-5)	
	3. Households with 1 or bedrooms fewer than needed AND who would need or like to move	779	HNADA Survey: Q19 (4-5) X Q49	
	4. Households with 1 or more bedrooms fewer than needed AND who need to move to bigger home	131	HNADA Survey: Q19 (4-5) X Q50 (16)	
5. Households with waiting list points: overcrowding		RSL waiting list data		
1.4 Support Needs	Need for Aids or Adaptations			
	1. Households who require installation of aids or adaptations in their current home	501	HNADA Survey Q69 (2-19).	501
	2. Dissatisfied with current home because it requires aids or adaptations	95	HNADA Survey Q24 (4)	
	3. AC waiting list for adaptations		OT/PSHG waiting list data	
	Need for Special Forms of Housing			
	1. Households who require special forms of housing	2,493	HNADA Survey Q66 (1-7)	2493
2. Difficulty using stairs is a serious problem for the household	103	HNADA Survey Q80 (9)		
3. Households with waiting list points: medical				
Need for Housing with Support				
1. Households who require housing support services	200	21 households who require support require accommodation based support i.e. it cannot be provided in situ	200	
1.5 Poor Quality	1. Quality of home is a serious problem for the household	178	HNADA Survey Q 80 (4-6)	428
	2. Dissatisfied with current homes because of poor condition	266	HNADA Survey Q24 (7)	
	3. Estimate of BTS (SCHS - 1996)	428	1% private housing stock AC Data or private sector stock condition data. Estimate based on 1996 SCHS updated by 2002 survey.	
	3. Estimate number of BTS properties in Angus	500		
1.6 Harassment	1. Harassment is a serious problem for the household	200	HNADA Survey Q80 (3)	127
	2. Households who have moved in the last 5 years as a result of harassment	127	HNADA Survey Q33E (3)	
Total Number of Households in Current Need				4,922

Net Backlog of Households in Current Need				
Component	Options	Measure	Data Source	Angus
X = Number of Households in Current Need				4,922
Y = In situ adjustment	1. Households who require installation of aids or adaptations in their current home	680	501 households who require aids and adaptations + 179 households who require in-situ support	680
	2. Number of homes where aids & adaptations have been installed given current annual budget available		Data on Stage 3 completions (HAG)/OT Service Outcomes/PSHG Expenditure.	
Z = % of households who cannot resolve need in private housing market	1. CACI Paycheck income profile X weighted average house prices	73%	CACI Paycheck X 2007 Sasines Data	0.54
	2. CACI Paycheck income profile X lower quartile house prices	54%	CACI Paycheck X 2007 Sasines Data	
	3. Sample income X lower quartile house prices		HNADA Survey Q81 X 2007 Sasines Data	
Net Current Housing Need			(X - Y) * Z	2,291

Newly Arising Need				
Component	Options	Measure	Data Source	Angus
2.1 New household formation	1. Number of households who have moved from previous home to form a separate household in the past 5 years	874	HNADA Survey Q35 (1-4)	

	2. Households where a family/household member has LEFT home to form separate household in Angus	840	HNADA Survey Q41	840
	3. Household members who would like to leave existing home to form a separate household in the next 2 years and remain in Angus	306	HNADA Survey Q44	
	4. Annual net GROS household projection (Ave Annual Increase 2009-2019)	364	2006 based household projections on Angus	
2.2 % New Households who resolve need in private housing market	1. Income profile of those who have moved from a household in the past 5 years X lower quartile house prices	0.67		0.67
2.3 Existing households falling into need	1. Annual number of priority homeless households (2007/08)	724	HL1 statistics	724
	2. Annual number of priority homeless households NET of potential new formers	481	HL1 statistics minus 16-25 yr olds = 243	
2.4 Total Newly Arising Need			(2.1*2.2) + 2.3	1,287

Affordable Housing Supply

Component	Options	Measure	Data Source	Angus
3.1 Available Affordable Dwellings	1. Number of Council & RSL vacancies in housing stock per annum		RSL stock and turnover statistics. AC: Ave turnover of 684 minus 153 LTV = 532). RSL: Ave turnover of 390 minus 5 LTV = 385)	917
3.2 Additional supply associated with reducing void levels	1. Snapshot of Council & RSL long terms voids		RSL void statistics. Definition - any void vacant for 90+ days	158
3.3A Planned new supply of affordable housing for rent	1. Programmed SHIP completions of affordable accommodate for rent		SHIP Approvals from Joyce Logan. Factored 25% reduction in completion	60
3.3B Planned new supply of intermediate housing	1. Programmed SHIP completions of intermediate accommodation options			
3.4 Units taken out of management	1. Council & RSL units for demolition/conversion		Council & RSL demolition/regeneration data	0
3.5 Total Affordable housing stock available			(3.1+3.2+3.3) - 3.4	1,135

Net Annual Housing Need

Component	Options	Measure	Data Source	Angus
A = Net Current Need				2,291
B = Annual Net Current Need over next 5 years			Net Current Need / 10	229
C = Annual Newly Arising Need				1,287
D = Total Annual Need			B + C	1,516
E = Total Annual Supply				1,135
Net Annual Housing Need			D - E	-381

TAYplan Housing Need & Demand Calculation - Comparison of data by local authority area
 Note: Baseline File Calculation was not prepared at a whole File and not NORTH FIFE area basis. Comparative measures have not been included in initial matrix

Component	Local Authority Area	Measure	Definition	Assumption	Source	Quality	Level of Risk	Action to Mitigate Risk
1.1 Homeless households & those in temporary accommodation	Perth & Kinross	458	Snapshot in temporary accommodation + those with insecure tenure	Homeless temporary accommodation HH population. Insecure tenure: historic movers as a result of NOP/NTQ/loss of tied accommodation/asked to leave	Temporary accommodation database & HNADA survey	95% confidence level: Time series 2008: Validation Evidence		No action required
	Angus	175		Reasons for homelessness which relate to insecure tenure e.g. 'evicted by landlord' and 'asked to leave', 'repossessed by mortgage company'	HL1 statistics	2008/09 HL1 data used as survey outcomes validated consistency but were marginally lower		No action required
	Fife		HL1 dataset + WL information on insecurity of tenure applicants		HL1 statistics	Ensure those in temporary accommodation is snapshot and not annual flow of homelessness households		Ensure 2005 baseline number of households in temporary accommodation is adjusted for 2009 increase. Derive HL1 measure of insecurity of tenure using Angus methodology
	Dundee City	640	Those in temporary accommodation or at risk of homelessness	At risk: friends/family no longer willing/able to accommodate, relationship breakdown, loss of tied accommodation, NOP/NTQ, accommodation too expensive	HNADA Survey	95% confidence level: Time series 2008: Validated to HL1		No action required
1.2 Concealed households	Perth & Kinross	360	HH sharing amenities	Households sharing amenities but not meals with another household	HNADA Survey	95% confidence level: Time series 2008:		No action required
	Angus	219				95% confidence level: Time series 2009:		No action required
	Fife		No measure in calculation - could underestimate extent of need					Use HL1 and WL proxy and benchmark to other areas
	Dundee City	170	HH sharing but not potential households	Couples/single parents who moved/applied to social housing from parental home or looking for rented accommodation	HNADA Survey	Excludes households sharing amenities or moved into private sector options		Check survey questions for alternative options, check quarterly HL1 data, WL figure?
1.3 Overcrowding	Perth & Kinross	2,330	Subjective assessment of bedrooms fewer than needed validated by WL benchmark using SG bedroom standard	Those with bedrooms too few triangulated with WL applicants with points for overcrowding	HNADA Survey/WL Data	95% confidence level: Time series 2008:		No action required
	Angus	779		Households with bedrooms too few cross tabulated with need to move	HNADA Survey	95% confidence level: Time series 2009:		Validate to WL data when available to benchmark to SG bedroom standard
	Fife			2% benchmark derived from Scottish Household Survey 2005/06 applied to Fife household population	Scottish Household Survey	2005/06		Benchmark to WL analysis for Fife. Check assessment convention to ensure consistency with bedroom standard
	Dundee City	2,120	Benchmark to SG bedroom standard	Number of Bedrooms recorded Vs number of bedrooms required by standard	HNADA Survey	95% confidence level: Time series 2008: Validation Evidence SHCS		No action required
1.4 Support Needs	Perth & Kinross	2,941	Unmet need for aids & adaptations: housing support: special forms of housing	Double accounting eliminated between categories to provide independent requirements for provision of aids/adaptations/housing support (both floating & accommodation based)/special forms of housing included sheltered/supported etc	HNADA Survey/WL Data	95% confidence level: Time series 2008:		No action required
	Angus	3,194				95% confidence level: Time series 2009:		No action required
	Fife				HNADA Survey updated to reflect growth in household numbers since 2005	95% confidence level: Time series 2005		Rework categorisation to provide consistent sub-categories i.e. unmet need for aids/adaptations, special forms of housing: unmet need for housing support
	Dundee City	2,420	Unmet need for aids & adaptations	Particular need households (medical condition or disability) who require but do not have adaptation	HNADA Survey	Makes no assessment for households with particular needs who require special forms of housing - potential underestimation of level of need		Check survey questions for alternative options, WL figure?
1.5 Poor Quality	Perth & Kinross	1,173	Number of private sector homes below tolerable standard	Focus on minimum property standard to define need	Private sector stock condition survey: TS falls	2003 private sector stock condition survey		No action required
	Angus	428				1996 private sector stock condition survey updated with 2002 boosted sample		No action required
	Fife				2008 BTS Survey		No action required	
	Dundee City	5,410	Subjective assessment of outstanding repairs	3+ repairs required and household intends to move as a result (all households)	HNADA Survey	Validation of private sector disrepair to SHCS seems realistic. Subjective response to social tenants more questionable particularly given capital expenditure on SHOS delivery. However, see in-situ line for adjustment to ensure appropriate consistency		Check tolerable standard levels
1.6 Harassment	Perth & Kinross	137	Households suffering from harassment	Harassment is a serious problem for the household	HNADA Survey	95% confidence level: Time series 2008:		No action required
	Angus	127				95% confidence level: Time series 2009:		No action required
	Fife			No serious instances of harassment detected	HNADA Survey	95% confidence level: Time series 2005:		Benchmark to HL1/WL?
	Dundee City	320	Not included in assessment as not bricks and mortar issue	HNADA Survey measure of 320 is available		Consistency issue/deviates from guidance		Include to ensure greater consistency with PKC, AC & FC
1.7 Total Current Need	Perth & Kinross	7,399	Consistent sum of each six unsuitability categories of HNADA Guidance (March 2008)					
	Angus	4,922						
	Fife							
	Dundee City	11,080						
x = Number of Households in current need	Perth & Kinross	7,399						
	Angus	4,922						
	Fife							
	Dundee City	11,080						
y = in situ adjustment	Perth & Kinross	2,098	Eliminate those who needs could be met with in existing housing given extent/nature of investment and expenditure available	All those who require minor adaptations (as alternative housing does not present Best Value in meeting need). Assessment of requirement for major adaptations against expenditure to execute	HNADA Survey: HRA/HAG 3/07 expenditure	95% confidence level: Time series 2008:		No action required
Angus	680	95% confidence level: Time series 2009. NB: lower proportion of in-situ solutions applied given higher proportion of households who require special forms of housing as opposed to in situ solutions/floating support services					Benchmark requirement for special forms of housing against WL data when available.	
Fife		Methodology as above provided outcome in 2005 that 18.6% of all households could meet need as a result of in situ solutions		HNADA Survey outcome (18.6%) applied to 2009 update of current need	95% confidence level: Time series 2005		No action required	
Dundee City	4,750	All those who have 3+ repairs but no other need and don't wish to move: PLUS those with particular need who require no more than 3 adaptations		HNADA Survey	Consistency issue with methodology		Check % of total special need + poor condition categories eliminated	
z = % of households who cannot resolve need in private housing market	Perth & Kinross	40%	% households who cannot meet LQ price	Benchmark 3.5 CACI income to LQ prices	CACI Paycheck/2007 Sasines Data	At time of comparison, most current datapack on household income/house prices from Scottish Government		No action required
	Angus	54%				Update with North Fife specific affordability indices		No action required
	Fife						Methodological inconsistency on affordability assessment: relates to population in need not total existing household population	
	Dundee City	72%	% households in need who cannot afford market entry level property	Eliminate households who can afford to resolve housing unsuitability in private housing market	HNADA Survey/2007 Sasines Data	% who cannot afford seems high given market entry benchmark		
Net Current Housing Need	Perth & Kinross	2,120	Consistent calculation of net current need based on gross need adjusted for in-situ solutions/those can afford market options					
	Angus	2,291						
	Fife							
	Dundee City	4,558						
2.1 New household formation	Perth & Kinross	853	Annual flow of new households who will form and require housing in area	Not gross formation - policy judgement to select GROS as it provided greater net increase than survey derivatives and provided consistency with LP growth assumptions	GROS net household formation	2006 based household projections: 2008 base year		Test impact of using gross relets to compare methodological approach of other authorities
	Angus	840		Annual flow of households where a family/household member has LEFT home to form separate household in Angus (historic formation patterns)	HNADA Survey	95% confidence level: Time series 2009. Based on historic movement which provides more defensible formation profile than predictive		No action required
	Fife			Establish formation rate of 'potential households' (i.e. those who wish to move and form separate households) and apply to GROS 2006 based projections	HNADA Survey/2006 based household projections	95% confidence level: Time series 2005. Based on predictive movement		No action required
	Dundee City	1,575		Establish formation rate of 16-34 and apply to GROS 2006 based projections	HNADA Survey/2006 based household projections	95% confidence level: Time series 2008. Based on historic movement which provides more defensible formation profile than predictive		No action required
2.2 % of New households who resolve need in private housing market	Perth & Kinross	54%	% of new households who cannot afford to meet need in market	Benchmark 3.5 income of households who have moved in last 5 years to LQ prices	HNADA Survey/2007 Sasines Data	margin of error higher given non response bias of survey on income questions. CACI proxy LQ tested as potential benchmark and discarded		No action required
	Angus	67%						No action required
	Fife				CACI Paycheck/2007 Sasines Data	Difficult to track how affordability test on new households differs from existing households in current need (CACI/2007 sales). Text in HONDA does not make this distinction clear.		Update with North Fife specific affordability indices and check whether income profile has been/can be adjusted to reflect circumstances of household sub-set of new formers
	Dundee City	47%	Benchmark 3.5 CACI income to LQ prices	% total households with less than £22,857 as proxy for new households	CACI Paycheck/2007 Sasines Data	CACI profile (of total household population) may not be representative of income profile of new households		Prepare LQ income profile of CACI and benchmark to LQ prices
2.3 Existing households falling into need	Perth & Kinross	533	Annual flow of homeless households awarded priority need status	Focuses on acute need as a result of loss of housing status	HL1 Data Trends Analysis	Analysis based on latest HL1 data book validated by Scottish Government		No action required
	Angus	724						No action required

	Fife		Number of existing households, previously satisfactorily housed, falling into need on an annual basis for reasons of emergency	Emergency rehosing cases on Fife Council Waiting List	FC WL data	Variance in datasource and methodology given use of DETR guidance. Update with HL1 proxy		
	Dundee City	360	Movers into social housing net of formers and immigrants over the last 5 years (discounted those 16-24 in order to net off new formers)			Only considers those who lose housing status and then access social housing. Entry to sector tends to be on a planned and not emergency basis so may not be good indicator of change in circumstances. Entry to sector may be to access specific products and not to resolve need, which particularly may be the case for older households. No validation to other sources. HL1 validation for temporary accommodation recorded 514 households in 4 months. Annual equivalent could be in region of 1,542 which is significantly higher than survey derivative		Could result in major underestimation of need on client group who absorb significant proportion of affordable supply. Test HL1 proxy figure for annual flow of priority households.
2.4 Total Newly Arising Need	Perth & Kinross	994	Total newly arising need consistently established by eliminated new former who can afford market options plus existing households who fall into need.					
	Angus	1,287						
	Fife	0	Total newly arising need figure dependent on immigrant household component which does not feature in new guidance. Variance in annual flow significant when this is eliminated. Should be balanced to some extent by revised figure for households who fall into housing need using HL1 proxy measure.					
	Dundee City	1,100	Total newly arising need consistently established by eliminated new former who can afford market options plus existing households who fall into need.					
3.1 Available Affordable Dwellings	Perth & Kinross	684	Annual average gross relets (i.e. total vacancies including Council & RSL relets).					
	Angus	917	Need North Fife specific vacancy data					
	Fife		NB NET RELETS					
	Dundee City	2,161	Use of net relets as opposed to gross eliminates 293 transfer lets each year which are not accounted for in the calculation. Surplus is potentially underestimated as result. Major mismatch between the proposed elimination of social tenants from demand (436 per annum) and number of transfer tenancies (729 per annum)					
3.2 Additional supply associated with reducing void levels	Perth & Kinross	0	No structural voids identified					
	Angus	158	Total relets adjusted for long term voids which have been added back into total vacancies					
	Fife		Relets have been calculated on stock adjusted for transitional voids					
	Dundee City	0						
3.3A Planned new supply of affordable housing for rent	Perth & Kinross	150	Derived from projected SHIP profile of completions					
	Angus	60						
	Fife							
	Dundee City	138

Backlog of Households in Current Need		Dundee
Component	Data Source	
1.1 Homeless households & those in temporary accommodation	LA Temporary Accommodation Stock List	2,120
	HL1 statistics	670
	HNADA Survey	640
1.2 Concealed households	Council/RSL waiting list data	450
	HNADA Survey	170
1.3 Overcrowding	Council/RSL waiting list data	2,120
	HNADA Survey	2,000
	SHCS	910
1.4 Support Needs: Adaptation Special Housing	SNS 2005/06	2,420
	HNADA Survey	1,802
1.5 Poor Quality	Council/RSL waiting list data	1,370
	HNADA Survey	1,500
	SHCS 2002	1,175
1.6 Harrassment	Prof Judgement on survey data	5,410
	HNADA Survey	320
1.7 Total current need	HNADA Survey	11,080
		10,000

This includes snapshot of 156 households at end of quarter plus full quarter of PN applications to reflect period when survey was undertaken = 514
 Those in temp accom or at risk of homelessness due to friends/family no longer able/willing, relationship breakdown, tied accom end, NOP/NTQ, accom too expensive
 On list with homeless points
 Includes couples/single parents who moved into social housing from parental home, those currently looking but can't find somewhere to rent, those who have applied for social housing
 Is 'close in number' but doesn't give actual value
 Benchmark number of recorded bedrooms against SG bedroom standard
 Particular need households (medical condition or disability) who require but do not have adaptation
 Condition of home is a serious problem (2% of total household base)
 2% households live in BTS or in serious disrepair (1,000 - 2,000 dwellings). Predominately private sector
 3+ repairs required and household intends to move as a result. All households
 Not included as category in calculation. 80% are social renters which are excluded from calc.
 If minus social renters then = 6720; If minus social renters & harrassment then = 6400
 10,000 estimate is used

Net Backlog of Households in Current Need		
Component	Data Source	
X = Number of Households in Current Need		11,080
Y = In situ adjustment	HNADA Survey	4,750
Z = % of households who cannot resolve need in private housing market	HNADA Survey Q X 2007 Sasines Data	0.72
Net Current Housing Need	(X - Y) * Z	4,558

Inclusive of all households including those in social housing
 Those who have 3+ repairs but no other need & don't wish to move
 Those who have household member with a particular need that require no more than 3 adaptations
 Is £80k lower quartile price? £80k described as 'market entry' price. Divided by 3.5 to establish minimum income required to purchase. Those falling below £22857 in CAN'T category & vice versa
 3.5 Xs income using market entry level price (£80K). Those with at least £80K equity in CAN afford category. Those in receipt of disability benefits in CAN'T category

Newly Arising Need		
Component	Data Source	
2.1 New household formation	HNADA Survey Recent Moves	1,369
	HNADA Survey Historic Move From	1,575
	HNADA Survey Predictive Move	1,712

1.7 Total current need	1,440	604	1,972	785	8,380		4,972	1,885	3,087	4,972		

Derived from Table 3.22 of File HONDA

Backlog figures split to Cupar/St Andrews HMA based on number of households.

Net Backlog of Households in Current Need	Component									
X = Number of Households in Current Need	2,930	1,166	2,552	1,713	8,380		4,972	1,885	3,087	4,972
Y = In situ adjustment	466	250	129	186	1,498	-0.43	854	324	530	854
Z = % of households who cannot resolve need in private market	54.90%	70.08%	83.30%	46.25%	63.63%	68.70%	69%	59%	70%	69%
Net Current Housing Need					4,380		2,829	915	1,790	2,705

Affordability indices at HMA derived from File HONDA; Table 4.24.

NB: Outcome will not match 2,829 as aa results of affordability %'s applied by HMA

Newly Arising Need	Component									
2.1 New household formation	56	25	180	37	298	0.04	310	117	192	310
2.2 % New Households who resolve need in private housing market	100%	50%	100%	66.67%	79.17%	53.40%	53%	59%	70%	53%
2.3 Existing households falling into need					179		179	68	111	179
2.4 Total Newly Arising Need	57	12	181	25	415		344	137	246	383

NAN figures split to Cupar/St Andrews HMA based on number of households.

Affordability indices derived from File HONDA; Table 4.24. Could not identify from Table 5.5 where analysis of affordability of new households was undertaken so used HMA figure from 4.24 as proxy measure

NB: Outcome will not match 344 as aa results of affordability %'s applied by HMA

Affordable Housing Supply	Component

HNADG Table 6.3 (Stage 1)	HNA Survey Questions	Component of Need	Output	Comment on Source	PKC	Eastern	Greater Perth	Highland	Kinross	Strathearn	CHECK	
						21	300	1	33	0	355	
Gross Backlog of Need	1.1 Homeless households and those in temporary accommodation - those with insecure tenure	<p>Option 1: Snapshot of households in temporary accommodation = 355 (supply info from TA Model 2009)</p> <p>Option 2: No of Households on CHR List (points for homelessness) July 2008 = 411</p> <p>Option 1: HL Households with insecure tenure 2007/08 = 554</p> <p>Option 2: Q41 (14-16) Reasons for move in past 5 yrs X HMA = 103</p> <p>Option 3: Q84 (2) Threat of Eviction is a serious problem for household X HMA = 92</p>	<p>Priority backlog in temporary accommodation</p> <p>Insecure Tenure (NOP/NTQ)</p>	<p>5</p> <p>5</p>	<p>08 02 09: On further examination of the disaggregated model, the WG agreed that this figure should align with the Council's Temporary Accommodation Model 2009. This figure may change as a result of the temporary accommodation model being finalised</p> <p>11 02 09 : Email this figure currently reflect TA Model but may be adjusted once model is finalised.</p> <p>08 02 09: WG agreed that 103 was an appropriate albeit conservative measure to use. Breakdown of reasons in Option 1 was considered. This shows that 57% (314) of those were in the 'asked to leave category'. 240 resulted in loss of tenancy/arrears etc.</p>	355	21	300	1	33	0	355
	1.2 Concealed households	<p>Option 1: Census (2001) No. of Households in a Shared Dwelling = 19</p> <p>Option 2: No of HMOs 2008 = 71</p> <p>Option 3: Q17 (2-5) Sharing Amenities with another household X HMA = 486</p> <p>Option 4: Q17 Households share amenities with another household but not meals (eliminating those that share meals with another household) = 360</p>	Sharing amenities	5	<p>08 02 09: Option 1 seems very low. The Census definition of a shared dwelling no. of rooms available to the household includes only bedrooms, living rooms & kitchens ie excludes bathrooms, toilets, etc.</p> <p>Option 4 was selected as it referred to the statutory definition of shared households. The household profile of Q17 is 270 are in private sector & 70 rent from Council (NB none of the sample stated they were in Temp Accom)</p>	360	11	148	20	120	61	360
	1.3 Overcrowding	<p>Option 1: (July 2008) Total WL (1269) & TL (287) Overcrowding Points = 1,556</p> <p>Option 2: Q20 (4&5) 1 or 2 Fewer than Needed X HMA = 3,623 (all households)</p> <p>Option 3: Q20 (4&5) 1 or 2 Fewer than Needed X HMA = 3,492 (eliminating single hholds)</p> <p>Option 4: Q20 (4&5) 1 or 2 Fewer than Needed X Q58 (22) EXPECT to Move to a Bigger Home X HMA = 388 (All households)</p> <p>Option 5: Q20 (4&5) 1 or 2 Fewer than Needed X Q58 (22) EXPECT to Move to a Bigger Home (please eliminate like to move) X HMA = 358 (eliminating single households)</p> <p>Option 6: Census 2001 Overcrowded hholds = 4,264</p>	No. of households with bedroom spaces too few who need to move	5	<p>08 02 09: A number of options to triangulate between options has been identified.</p> <p>Triangulation Options 1 & 2 = 2590 Triangulate Option 1 + Option 4 = 972</p> <p>Option 10: Option 3 - Option 4 & triangulate Option 1 = 2330</p> <p>Option 11: Option 3 & Q54 (Exclude single & SR) = This option was not calculated as Q54 relates to forming households rather than current need</p>	2330	277	1190	381	108	372	2330
	1.4 Support needs	<p>Adaptations</p> <p>Option 1: Q73 (2-19) No of Respondents with Unmet Need for Adaptations X HMA = 1649</p>	Unmet requirement for aids/adaptations or equipment		<p>08 02 09: Council felt this was a conservative measure and agreed that it should be used.</p>	1649	224	363	459	303	300	1649
		<p>Special Needs Housing</p> <p>Option 1: CHR Waiting List Medical Needs (July 2008) = 513</p> <p>Option 2: CHR Transfer List Medical Needs (July 2008) = 195</p> <p>Option 3: Total Social Medical Needs Housing (Transfer +WL) = 708</p> <p>Option 4: Q71 (1-4) No of respondents with Unmet Need for Special Housing X HMA = 798</p> <p>Option 5: Q57 (2) Expect to move in 2 yrs to Q58(1) Specialist Accommodation X current HMA =</p>	Unmet requirement for special forms of housing	5	<p>08 02 09: Council felt an accurate measure would be to triangulate between the Survey and the WL. These was some discussion concerning removing the need for special needs housing from the calculation. This would reduce the annual need from 740 to 633. The Council is asked to confirm its approach to this measure.</p> <p>11 02 09: Email - Council wish to include figure for the time being but would like to have the facility to remove the figure to test the impact on overall need.</p>	753	115	321	87	109	120	753
		<p>Support Needs</p> <p>Option 1: Q72 (1-4) No of Respondents with an Unmet Need for Support X HMA (eliminate Multiple Needs) = 539 (of those 449 are in situ)</p> <p>Option 2: Q84 (11) No of respondents who require to move to receive support is a serious problem X HMA = 322</p> <p>Option 3: Q57 (2) Expect to move in 2 yrs for Q58(2) Health/Care / Support Reasons X current HMA = 155</p>	Unmet need for housing support	5	<p>08 02 09: Council felt this was a conservative measure.</p>	539	141	0	141	143	114	539
	1.5 Poor Quality	<p>Option 1: SDP Projected TS fails 2009 = 0</p> <p>Option 2: Private Sector TS only Fails 2003 = 1173</p> <p>Option 3: CHR WL Points for BTS = 148</p> <p>Option 4: CHR TL Points for BTS = 3</p> <p>Option 5: Total Social Need = 151</p> <p>Option 6: Q31 (all) X HMA = 4462</p> <p>Option 7: Q84 (4-6) Quality of Home X HMA = 311</p>	Number of BTS properties or those with serious disrepair	5	<p>08 02 09: Agreed to look at TS fails rather than SHOS fails. Council has provided area profile.</p>	1173	187	473	209	94	208	1173
1.6 Harassment	<p>Option 1: CHR Waiting & Transfer List = 0</p> <p>Option 2: ASB/Police Records on Harassment average 2005-2008 = 61</p> <p>Option 3: Q84 (3) Harassment is a serious problem for household X HMA = 137 (further 117 said slight problem)</p> <p>Option 4: Q41E (3) Moved due to Harassment from neighbours X HMA = 16</p>	Need to move as a result of harassment	5	<p>08 02 09: Felt the survey measure best represented a snapshot of needs in the area.</p>	137	43	53	41	0	0	137	
1.7 Total current housing need		1.1 + 1.2 + 1.3 + 1.4 + 1.5 + 1.6			7399	1025	2916	1346	910	1197	7399

2120	270	995	481	204	309	2120

HNADG Table 6.5 (Stage 2)	HNA Survey Questions	Component of Need	Output	Source
2.1 New household formation (net change)	Moved from a Household Option 1: Q45 Moved from a household in 5yrs within PKC (1 & 4) X HMA = 700 Someone Left Household Option 2: Q48A Someone Left in past 5 yrs (1 & 4) X Q48B Moved within PKC = 472 Households Expected to Form Option 3: Q51 (no of hholds to form in 2 yrs) X Q54B Within PKC = 1472 Option 4: Q57 (2) Current Hholds Expect to move in 2 yrs X Q59B Within PKC = 547	Number of households who have/wish to form/left existing households in previous years	6A	08 02 09: WG suggested considering the GRO household formation rate in Perth should be considered as an option. An alternative measure may be to triangulate Option 5 with Option 2 - information that has occurred in past 5 years. 11 02 09: Email - Council wish to use the GRO figure of 853. GRO area profile will be used as per planning.
2.2 Proportion of new households unable to buy or rent in the market	Private Sector Affordability Option 1: Q43 Moved from a Household in Past 5 yrs X Q85A Annual Income X Lower Quartile House Prices = 54% cannot afford Option 2: Q43 Moved from a Household in Past 5 yrs X Q85A Annual Income X Income Option X Weighted Average House Prices = 93% cannot afford Affordability Options PRS Option 1: Newly Formed Households unable to afford lower quartile rents in PRS = Rent Sample is v small Option 2: Newly Formed Households unable to afford average rents in PRS = 68% cannot afford - NB No PRS sample in Kinross (sample is v small)	% of recently formed households who cannot afford to buy	6A	08 02 09: 54% was felt to be a reasonable measure. Lower quartile prices reflects market entry levels rather than weighted average.
2.3 Existing households falling into need	Option 1: Average No. of households in priority need (07-08) = 533		6A	08 02 09: Council agreed that this figure should represent the figure utilised in the Temporary Accommodation Model 2009. This figure is provisional at present and may be subject to review. It should also be noted that this does not increase a % increase on the Housing Register. 11 02 09: Email - Council wish to use output from TA Model which is yet to be finalised.
2.4 Total newly arising housing need =		(2.1 x 2.2) + 2.3

1328	191	726	161	165	112	1328

HNADG Table 6.7/6.8 (Stage 3)	HNA Survey Questions	Component of Need	Output	Source
3.1 Affordable dwellings occupied by households in need	Option 1: Council Turnover Av 2006-2008 = 373 Option 2: Net of long term voids (0) = 373	PKC turnover (prime lets and transfers)	6B	08 02 09: Council confirmed re-let figures and no long term voids. 11 02 09: Email - 373 figure will be adjusted for RTB sales from 2008 onwards as per TA Model info
	Option 1: SCORE average re-let 2004-2007 = 284 (excludes 42 HMA unknown) Option 2: APSR 2007-2008 = 311 Option 3: Option 2 Net of long term voids (0) = 311	RSL turnover (prime lets and transfers)	6B	08 02 09: WG agreed that APRS was a more accurate measure to use. This has been split by the RSL stock profile in order to get re-lets by HMA. 11 02 08: Email - Council wish to ensure the this figures takes into account stock in future years with new build.
3.2 Additional supply associated with reducing void levels	Option 1: Council Long Term Voids 06-08 = 0 Option 2: RSL long Term Voids = 0 Option 3: Total Long Term Voids = 0	Guidance note: where void rate exceeds 3% of the total stock & properties are vacant for long periods, it should be counted as additional supply		08 02 09: WG confirmed that there were no long term voids in the PKC area.
3.3 Planned supply of new affordable housing	Option 1: SG Projections on new build affordable units = no info provided Option 2: PKC Land Audit Capacity for the Average no of units 2007-2014 = 98 p/a Option 3: SHIP projected completions av 2009 - 2014 (Social Rented New Build) = 150 p/a	Average annual number of units delivered by Scottish Government HAG investment programme		08 02 09: WG confirmed that new build SR rate should reflect that profiled in the recent Temporary Accommodation Model 2009. IN addition to inform the disaggregated model the area & size split will also be used. It is also assumed that 10% of these units are Special Needs
3.7 Annual supply of intermediate affordable housing available for re-let or resale at sub market levels	Option 1: SG Projections on new build LCHO & Homestake = no info provided Option 2: SHIP projected completions av 2009-14 (Shared Equity New Build) = 30 p/a	Average annual number of LCHO or Homestake units delivered by investment programme		08 02 09: WG confirmed that new build LCHO/SE rate should reflect that profiled in the recent Temporary Accommodation Model 2009. In addition to inform the disaggregated model the area & size split will also be used. It is also assumed that 10% of these units are Special Needs
3.4 Units to be taken out of management	Option 1: Council Units for demolition / out of management (2008-2009) = 63 Option 2: RSL units for demolition = 0 Option 3: Private Sector = 0 Option 4: Demolitions adjusted for re-lets = 3	Units closed for demolition (committee approval)/units taken out of management		08 02 09: Council confirmed that demolitions figure is 63 in 2008/09. The average relets of 373 as a % of the stock results in a turnover rate of 5% and the current stock figure is 7,573. If the stock base is reduced by 63 demos effective reduction on the annual relets is 3 (i.e 7573-63=7510*5%). The disaggregated model reduces stock by 48 units in 2009/10 & 2010/11
3.5 Total affordable housing stock available to meet housing need		3.1 + 3.2 + 3.3 - 3.4
